Description			
<p>Dear Manuel,</p> <p>I am missing a few helper applications / preprocessors that were available in the old Shadow version 2.3.2m-linux that came with ShadowVUI in xop2.3: srcomp, abrefc and jntpscalc. I checked the latest version 1.11.1 of ShadowVUI: in the source there are still calls to these applications, but in the accompanying Shadow3 binaries they are missing. Hence, these calls should give an error message (I have not actually installed ShadowVUI 1.11.1 but just checked the source).</p> <p>Are you planning to include these helper applications? Or do you plan to change the calls in ShadowVUI instead?</p> <p>Thank you very much for your help.</p> <p>Cheers,</p> <p>Peter</p>
