

vTAS - Feature #564

Re-organisation of instrument parameter panel, up-dating A2,A4 and A6 with actual values

18/02/2010 03:57 PM - Boehm, Martin

Status:	New	Start date:	18/02/2010

Target version:		Spent time:	0.00 hour
Description			
<p>At present, every instrument has its predefined angles A2, A4 and A6. They are applied every time, the instrument parameter panel is activated implying that the physical parameters ki, kf and Q are changed, which is very inconvenient for utilisation. I propose to apply the predefined angles only the first time: it is when vTAS is started or when the instrument is changed. Changing instrument values during the utilisation of the SAME instruments should take the actual values for A2, A4 and A6.</p>
